ShotGrid - Website - Creating a playlist

Playlists are a handy way of grouping together versions (the preview videos in ShotGrid) so you can easily review them. To get started, go over to the *Review* tab on your ShotGrid project page.

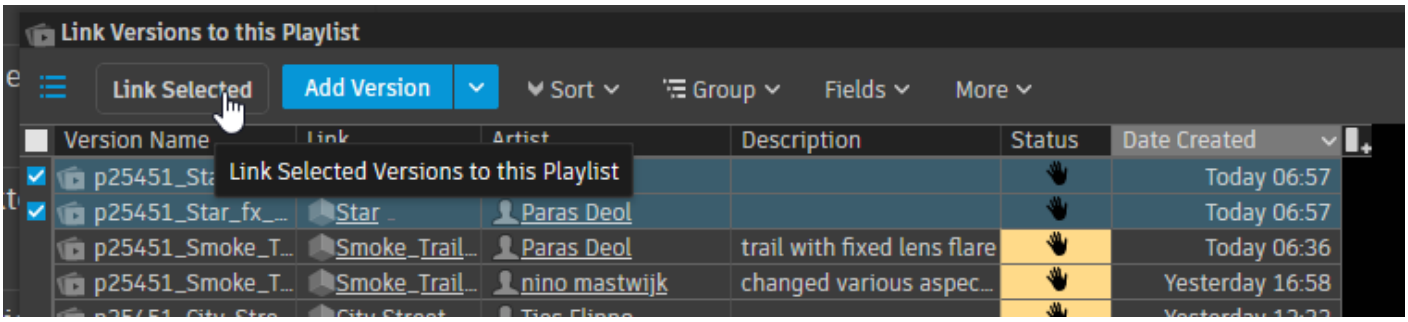

To add a version to your playlist you should play the *Link Versions* button.

> The *Add Version* button is used to create a *new* version, not to add an *existing* version to the playlist. The name is very confusing.

A small menu will pop up, click on the blue *advanced* text. A new window will appear:

This is where you actually need to select the versions that you want to add to the playlist. It might be useful to click on the *Date Created* column so newer versions show up first. Select the version you want to add and click on *Link Selected*. This will add the versions to the playlist.
